

PAK MAC

COMPANY PROFILE

OUR STORY

PAK MAC was established in 1995 as an authorized IT equipment and service provider company in Pakistan. It aims at fulfilling the expectation and requirement of its customers with full perfection. Since its foundation, the company has gathered IT professionals from various fields to build a strong management and technical base. PAK MAC has successfully gained trust and recognition in the marketplace and is confident of bringing service at a high level of expectation for its customers.

OUR VISION

We ensure quality from order processing and product delivery to responsive after-sales services. Responsive after-sales services include hardware, software & technical support. At present we work harder every day to link our customers with recent development & growth in computer technology with complete and guided freedom of choice. On the way to the goal of perfection, Pak Mac equips itself with flexibility & vitality being the characteristics which help us bring excellence to you.

OUR MISSION

Our aim is to provide effective solutions to our valued clients within their resources. Therefore, we consistently maximize value for our customers through our unique ability to provide a superior level of quality service, along with our aggressive pricing and our virtually instantaneous access to channel products.

OUR SERVICES

1. Corporate Services:

At our Display we showcase a wide range of Apple & other renowned brands for our valued customers, we also provide solution to customers according to their customized needs. However, our Corporate Sales staff has their focus on corporate sales and business development. We have supplied large orders to Govt. and Non-Govt. Offices. Our large customer base includes leading Advertising Agencies, Newspapers, TV Station, Bureau Services, Publishing Houses, Educational Institutions, Government Offices, Textile Designers, Digital Photographers, Local and International NGO.

2. Apple Authorized Service Provider (AASP):

We have well trained and qualified staff, providing services and support for Mac Products. Owing to this we run an Authorized Service Center in Pakistan.

3. Support & Service:

Selling of computer hardware is very easy but it is very difficult to keep it functional. As we mentioned above that we are an Apple Authorized Service Provider, that's why we have qualified staff with us to provide after sale services. Our principle provides us original parts for replacement.

4. Online Technology Guidance:

To keep up with the times we have established a strong online presence over social media and our website to help guide the community towards a tech focused tomorrow. Working constantly towards a future where we as an IT company owe to the community around us and want to help them with their daily lives with technology.

5. Active Tax Payer

The company is registered and actively paying tax up to date.
